

ANTARES.

CHILE

The brightest star in the southern sky

Antares Cabernet Sauvignon Rosé

The brightest star of the South Hemisphere

Chile is a long-skinny country on the south-west corner of South America. From north to south, east to west, the combination between man, climate and soil has opened new wine regions to the world. Main features to this mélange are the Andes Range alongside the East border, the Pacific Ocean on the west coast, the Atacama Desert up north and the Patagonia down south. A land of explorers and adventurers, this wine country gives birth to thrilling wines.

Fermentation & Ageing

In order to capture the fresh and fruity character of this Rosé, grapes were carefully pressed, the must remaining in contact with the skins for several hours of cold maceration. Later, it was fermented in stainless steel tanks at controlled temperatures of 10-12°C (50-54°F) using selected yeasts for optimum development of aromas and flavour.

Tasting Note

A wine with a lively pink colour of medium intensity, its aromas are intense, characterized by citric notes which combine perfectly with intense red fruit flavours such as strawberries and raspberries. On the palate the wine is fresh and silky and has a lovely finish.

Food Serving Suggestions

Enjoy this wine as an aperitif or with light meals.
Serve it between 10°C and 12°C (50°F to 54°F)

Ageing Potential

Have it now.
